<b>11.30 am to 12.15 pm “Healthcare Financing &amp; Funding”</b>	
<i>India is currently engaged in battling the dual burden of communicable and non-communicable diseases, which developed countries have had to deal with only sequentially....Government has its own restrictions in providing more funds and hence Private Sector represents about 80% of the 5-6% of GDP that India spends on healthcare...despite healthcare being accorded infrastructure status, the benefits are yet to reach the healthcare providers.in spite of progress in various levels, Indian healthcare still suffers from large gap between supply and demand...as corroborated by the existing number of beds and the consequent facilities vs the actual demand to achieve the minimum millennium goal requirements...nearly 50% of our population travel more than 100Kms to access a higher level of care...what is the mantra to attract more funds for this critical sector? Is it time to think of creative funding like REITS?</i>	<b>Moderator: Dr. Rana Mehta, Partner &amp; Leader Healthcare PricewaterhouseCoopers Private Limited</b> <b>Panelists:</b> <ul style="list-style-type: none"> <li>• Dr. Raajiv Singhal</li> <li>• Mr. R Venkatesh</li> <li>• Mr. Bhavdeep Singh</li> <li>• Mr. Sunil Thakur</li> <li>• Ms. Ameera Shah</li> <li>• Mr. Rajeev Ahuja</li> <li>• Mr. Mayank Bathwal*</li> </ul>

This has been a focus area for NATHEALTH and in collaboration with various stake-holders we are suggesting improvements to scale up PPPs in Healthcare in India.</i> <ul style="list-style-type: none"> <li>• How can we energise PPP in Indian Healthcare?</li> <li>• PPP is successful in many sectors-then why is healthcare lagging behind?</li> </ul>	<b>Moderator: Mr. Parijat Ghosh, Partner, Bain &amp; Co.
