11.00 am to 11:15 am Networking & Fellowship tea/coffee

11.15 am to 12.15 pm "Top clinicians: Concerns and Challenges in today's Healthcare"

*Today there is **significant trust deficit** between patients/families and healthcare professionals. This is against a backdrop of **easily accessible**, even if questionable, information about diseases and treatment methods online and some **high profile and publicised missteps** by professionals. This leads to a number of critical aspects around **informed consent**, the **cost and efficacy of different treatment paths/ choices**, **time starved professionals** and (credible) **information starved patients**, **medical liability** and how these need to come together for a **productive relationship** between the healthcare professional and the patient/family.*

This session on 'Top Clinicians' is perfectly aligned with our theme 'Heal' as it focuses on enhancing quality, access and affordability of healthcare services in India. 'Heal' is the primary concern for all stakeholders of the sector including Governments.

equivalent payers

- *...in addition to appealing only to the uninsured there*

This session on 'Medical Tourism' will explore India's aspirations to reinvent itself as a high-quality destination for medical and wellness travel, and discuss the enabling factors needed to achieve this- both within and outside the realm of medical service delivery

2.45 pm to 3.30 pm "Primary care: Health and Beyond...Strategies for a better India"

1. Government spending in India is around 1% of GDP
2. Healthcare outcomes are still short of MDG/SDG goals, often by large margin
3. Primary healthcare is the back-bone of public health; it is the last mile of delivery
4. India's Primary Healthcare system needs very significant improvement
5. What is the path forward for Primary Healthcare transformation?
6. How does National Health Protection Scheme (NHPS) impact the path going forward? What might be the way to convert the 1,50,000 sub-centres to Health and Wellness Centres?

This session is aligned with our theme 'Heal' and 'Empower' because primary health care is the backbone of healthy India and NHP 2017 also emphasises on improving primary healthcare.

3.30 pm to 4.15 pm "Global perspective on Indian Healthcare and its evolution"

India has a fast-growing economy as well as an ever-expanding, ever-urbanized population. Healthcare is one of India's largest sectors in terms of revenue and employment. The sector is growing at a tremendous pace owing to its strengthening coverage, services and increasing expenditure by public as well private players. Between 2012-25, the market is expected to grow at a CAGR of 12-15% and the total industry size is expected to touch USD330-450 billion by 2025. India simultaneously faces a huge challenge when it comes to providing quality and affordable healthcare to its large population. Sustainable health insurance, enabling regulations, collaborative private-public sector engagement, managing the dual burden of CDs and NCDs – among others – are all key imperatives and the need of the hour. The evolution of the healthcare sector is at the cross-road and a lot needs to be done to realize the full potential.

This session will 'Reinvent' India's healthcare sector from global perspective.

"Valedictory session: National Health Protection Scheme (NHPS)- A path-breaking game changer

and the way forward”

The provision of Rs 5 lakh per family per year for medical reimbursement under National Health Protection Scheme- “Aayushman Bharat” will go a long way to achieve the goals of Universal Health Coverage. The world’s largest government-funded health insurance programme would help both the patients and the providers. To ensure universal healthcare access and augment healthcare-related infrastructure capacity, the emphasis was on introduction of mandatory health insurance.

NATHEALH had recommended making health insurance mandatory and National Health Protection Scheme should significantly cover the insurance needs of the country. However, there are some other critical needs which have to be looked at- eg. according National Priority Sector Status to healthcare.

- *During the recent Budget, Government announced that there will be provision of up to Rs 5 lakh per family per year for medical reimbursement – be it for secondary or tertiary care hospitalisation. What are the challenges and possibilities ahead for healthcare insurers and providers?*
- *What would be the steps to implement this visionary scheme effectively?*
- *What are the potential roadblocks to such a scheme?*
- *What would the government need to do to ensure that the scheme is successful?*
- *How important is it to accord National Priority Sector status to healthcare?*
- *What would be the role of “Digital Health” and technology in general for enabling the success of NHPS?*

Moderator: Ms. Fatima Mahdi Karan, Consulting Editor, BTVI
