Mr. Amit Mookim

As we are going through a phase of great technology disruption, as the industry moves to its next phase of maturity, and as we battle both life-threatening diseases and malnourished children in one of the largest and fastest growing economies of the world, it needs responsible leadership, direction and a coordinated voice that represents in equal balance the patients, the industry and the public health system. NATHEALTH is evolving to play a critical role in helping shape this direction via its focus on high quality thought leadership, proactive engagement across all stakeholders and building credibility via a coordinated thought process to provide greater clarity in decisions that will have far reaching implications on the “health” of our nation.

Mr. Vikram Munshi

It is known that for a child the first 5 years lay the foundation for the child’s future health , happiness , growth and learning & development , in the same way in 5 years under the able leadership of Anjanda and the support of the NATHEALTH Team and the Governing Council , NATHEALTH has built a strong foundation and credibility on which it can now progress rapidly towards its vision.

Mr. Probir Das
